

CHRY SANT ANTHONY A. DAWA

Technology & Automation Specialist | AI Workflow Engineer | Full-Stack Developer

Bacolod City, PH • +639 271445954 • chrysantanthonydawa@gmail.com
github.com/anthonydawa • your-portfolio-site.com

Self-taught technologist with 10+ years of hands-on experience building automation systems, web applications, bots, and AI-powered workflows independently. Combines deep technical expertise with a proven track record of top-ranked client-facing performance, bringing both the builder's and the operator's perspective to every role.

PERFORMANCE HIGHLIGHTS

#1 of 1,500+ Comcast CSAT - Perfect Score	Consistent Top 5 Revenue - HP, Highest Orders	Selected 5 out of 100 Wilshire - Top Performer Kept	#1 Team Web Dynamics Revenue & Churn
--	--	--	---

Ranked #1 or top 5 in every client-facing role held, demonstrating that strong technical output and high-performance execution are not mutually exclusive.

TECHNICAL SKILLS

Bot Scripting	Web Development	AI / Prompt Eng.	Google Flow	Data Analytics	CRM Automation
Game Development	WordPress / SEO	Photoshop	Video Editing	JS / CSS / HTML	GHL / CRM Tools

NOTABLE PROJECTS

Market Trading Bot

Fully automated trading system built from scratch that monitors financial markets simultaneously, detects buying opportunities in real time, and executes orders without manual input.

Market Analytics & Data Mining Tool

Real-time data scraping and analytics engine for identifying profitable market opportunities through live data feeds and pattern analysis.

Booking Service CRM App

CRM-integrated booking application for scheduling, client management, and automated notifications, ready for live business deployment.

PROFESSIONAL EXPERIENCE

AI Accounting Agency | Founding Member & Tech Project Manager

Started Aug 2026

- Pioneering an AI accounting startup from the ground up by owning daily operations, building the technology foundation, and delivering client projects.
- Helping shape the company's operating model, systems, and day-to-day execution as a founding member and technology project manager.
- Building custom internal tools and workflows from scratch to reduce reliance on expensive subscription software and disconnected platforms.
- Managing client technology projects from planning through delivery, translating business needs into practical systems and automations.

Web Dynamics Intl | Customer Relations Manager & Internal Tech Lead

Sep 2023 - Aug 2026

- Built and deployed internal automation tools using GHL and third-party integrations, eliminating manual processes across a 1,000+ client onboarding pipeline.
- Leveraged AI tools and LLM-powered workflows to scale client communications and team operations without increasing headcount, contributing to the department's highest revenue YTD and lowest churn company-wide.
- Used Google Flow to generate images and produce video content for client campaigns and internal training, significantly reducing creative turnaround time.
- Led and mentored a team of Client Success Managers, implementing tech-driven systems that elevated team-wide performance across tracked metrics.

Downforce | Project Manager - Digital Courses & Coaching

Feb 2021 - Mar 2023

- Drove 2x revenue growth by applying data analytics to sales funnels and deploying automation tools that replaced repetitive manual workflows.
- Built and managed the full tech stack supporting course delivery, coaching scheduling, and client communications, including custom automations and third-party integrations.

Scale AI | Final Data Reviewer - Autonomous Driving AI

Jan 2020 - Feb 2022

- Reviewed and validated AI training data for autonomous vehicle models used by Waymo and Tesla, ensuring accurate object recognition and decision-making logic at scale.
- Applied systematic quality control processes to maintain high data integrity standards across large volumes of real-world driving scenarios.

Freelance - Jr. Web Developer | Japan-Based Client | CSS & Responsive Design

May 2016 - Jul 2018

- Developed responsive websites for an international client, marking the start of 10 years of continuous independent technical work built from the ground up.
- Supported senior developers on production projects, executing design and functionality tasks across multiple live web builds.

Freelance - Web Dev / SEO / Automation | Local Business Clients (Salon, Gym, Pet Store)

Project-Based

- Built high-converting websites, landing pages, and automated marketing funnels using WordPress and funnel platforms for local service businesses.
- Mapped and built end-to-end business automation workflows from lead capture and qualification through onboarding, customer success, renewals, and retention.
- Connected forms, CRMs, email and messaging systems, scheduling tools, and internal processes to create a consistent, trackable customer journey from start to finish.

Wilshire Capital | Appointment Setter

May 2023 - Sep 2023

- Selected as 1 of 5 top performers retained from a cohort of 100; consistently exceeded monthly metrics and maintained the highest qualified lead conversion rate on the team.

Comcast / Xfinity | Customer Service, Sales & Retention

Jul 2018 - Jan 2020

- Ranked #1 of 1,500+ agents with a perfect 100% CSAT score sustained over an entire month, the highest satisfaction record achieved at the time.

Hewlett-Packard (HP) | Customer Service, Sales & Retention

Jul 2018 - Mar 2020

- Consistently ranked top 5 in revenue sales with the highest number of orders placed month over month; maintained zero customer complaints across the full 2-year tenure.

EDUCATION

University of Negros Occidental Recoletos - Bachelor of Science in Civil Engineering | Bacolod City, PH

SKILLS & INTERESTS

Bot scripting & automation • AI workflow efficiency & prompt engineering • Google Flow (image generation & video creation) • Web & game development • Data science & analytics • Photoshop & video editing • Real-time market data analysis • Building personal productivity systems with AI • Exploring and stress-testing emerging AI tools
